JOB POSTING – LEAD INSTALLATION TECHNICIAN

Date: November 19, 2024
Period: Open until filled
Position Type: Full Time

Audio Logic Systems, an audio, video, and theatrical lighting integrator operating in the Upper Midwest, seeks an installation technician to join their current installation team. Audio Logic Systems serves a diverse client base of performing arts venues and houses of worship installing and maintaining complex audio, video, and theatrical lighting systems. Qualified applicants may apply for the position listed below by submitting the following items to Audio Logic Systems.

1. Cover letter detailing the reasons for the applicant's interest in the position and detailing one specific work experience (e.g. I worked at XYZ jobsite and installed a small video playback system consisting of ... equipment) relevant to the application. The cover letter shall be no longer than one page.
2. Current Resume
3. Three references that are familiar with the applicants work style and technical skills.

Send applications to:

JOB DESCRIPTION

LEAD TECHNICIAN - INSTALLATIONS

PRIMARY FUNCTION:

- Install AVL (Audio, Video and Theatrical Lighting) systems in commercial buildings and performance venues.
- Train and provide on site service to clients existing AVL equipment.
- Lead installs on job site, interface with ALS Project Managers and Designers, manage crews of 2-5 technicians.

DESCRIPTION:

- Install, maintain, troubleshoot and repair AVL systems
- Rig, using entertainment industry best practices, all AVL systems
- Accurately and timely document quality standards, system anomalies and project work
- Manage technicians and on job site project work flow; assign them appropriate tasks per job specifications.
- Maintain installation shop area.
- Work with building and electrical contractors.
- Assist Production Dept. on events periodically.

EXPECTATIONS:

- Be punctual and self-motivated.
- Effectively communicate schedules and job site changes to management and staff.
- Organize and prepare tools required for the installation(DSP files, specialty tools).
- Maintain knowledge of new and existing AVL products.
- Learn new software programs pertinent to the job.
- Be knowledgeable with equipment utilized in the AVL industry.
- Own and maintain a minimal set of small hand tools for working on job sites. List to be provided.
- Maintain your assigned company vehicle (at company's expense).
- Maintain the PLT license or Registered unlicensed PLT registration.

SKILLS

- Ability to read and understand CAD schematics and construction documents
- Soldering, AVL cable fabrication, cable pulling
- Rack assembly and termination
- Strong written and verbal communication skills and the ability to multi-task in a fast-paced environment
- Ability to interact directly with customers on the job site and effectively manage customer communication.

PHYSICAL DEMANDS

- The duties of this position require the ability to bend, kneel, crawl, climb ladders and to stand for long periods of time
- Candidate must be capable of working at heights and have good balance
- Candidate may be required to lift heavy equipment up to 75 pounds
- Adverse conditions may include noise and dust
- Wear steel toe boots when required by the job site.
- Job involves outstate travel.

EDUCATION & EXPERIENCE

- Bachelor's or Associates Degree preferred; will also consider Technical school training with electronics/installation training and related experience
- 3-7 years' experience with AVL installations of various sizes
- CTS certification preferred, Power Limited Technician License preferred.

COMPENSATION:

- Strong compensation package, including health, dental, retirement, life insurance and disability insurance.
